MORGAN BRIGGS

APPLICATION DEVELOPER | AUTOMATION | DATABASE SYSTEMS

Mount Vernon, WA | (916) 793-6597 | Bmorgan8906@gmail.com | linkedin.com/in/morgan-briggs-b43a10334 | morgan238-ctrl.github.io/morgan-briggs-portfolio/

PROFESSIONAL SUMMARY Application development and automation professional experienced building production business software, database- backed authentication, reporting pipelines, and operational tools. Skilled in C#, ASP.NET, SQL, VBA, PowerShell, and Microsoft Access, with hands-on ownership of requirements, testing, troubleshooting, and AI-assisted development.

TECHNICAL & BUSINESS SKILLS C# • ASP.NET • SQL Server • MySQL • Microsoft Access • PowerShell • VBA • Delphi • Database design • RBAC • Data imports • Debugging / testing • AI-assisted software development

PROFESSIONAL EXPERIENCE

RAINIER RAPID LLC — Finance Manager | Dec 2025–Present | Washington Promoted from delivery driver to Finance Manager within approximately three weeks; partner directly with company ownership on financial and operational improvements.

- Designed Access relational schemas, keys, indexes and SQL; developed PowerShell/Slack messaging and a SQLite-backed dashboard retaining Access as a read-only Raw Access refresh source, with JSON inputs and HTML display data.
- Independently developed an Excel VBA roster automation from a manual 60–90-minute daily process, then rebuilt the solution in Microsoft Access; reduced roster preparation to under 3 minutes.
- Estimated weekly reporting effort: 48+ to about 6 hours across six managers (at least 87.5% less); personal effort: about 20 to 2 hours (90% less). Based on approximate recurring preparation time before and after standardization, not time-study measurements.
- Use AI to accelerate prototyping and implementation; personally review code, debug where able, define requirements, test real operational scenarios, identify defects, direct corrections, and accept features against business needs.
- Built a standardized KPI engine to resolve six managers' contradictory reporting; redesigned dashboard imports with staging, validation, user correction, automatic revalidation and commit.
- Built a company-wide fully burdened driver-cost model incorporating compensation, taxes, insurance, fleet losses, and operating expenses to support staffing, forecasting, and route profitability decisions.
- Developed a rolling 13-week cash-flow forecast integrating revenue, payroll, fleet costs, vendor obligations, and cash balances for management planning.
- Recovered more than $85,000 in company funds through invoice disputes and vehicle repair reimbursements; identified $3,750 in recurring monthly vendor savings ($45,000 annualized).

HEALTH FINANCIAL SYSTEMS — Software Developer | Feb 2010–Feb 2015

- Developed and maintained healthcare financial reporting software using C#, ASP.NET, Delphi, VBA, SQL Server, and MySQL.
- Implemented database-backed customer authentication and role-based access controls tied to subscription tiers and healthcare facility types.
- Built reusable data imports and validation/error-handling workflows for datasets containing tens of thousands of healthcare financial reports.
- Optimized SQL queries and databases, increasing immediate report-download availability by approximately 50%.
- Developed SQL stored procedures and performed schema changes, database restores, testing, and production troubleshooting.
- Customized Salesforce customer account and permission functionality; administered Windows Server accounts, permissions, backups, and infrastructure.

- Developed original features and enhancements for HICARIS/IRIS healthcare reporting applications using C#, ASP.NET, Delphi, Java, HTML, CSS, XML, SQL, and VBA.
- Built adaptive compatibility logic for browser, operating-system, and Excel-version differences; configured virtual machines and tested application compatibility across environments.
- Supported Windows Server, SQL Server, web application, and database configuration; used TFS for version control and completed assigned Asana defects and tasks.
- Documented defect investigations, resolutions, and follow-up in Salesforce CRM.

NORTHWEST GROWN PRODUCTS LLC — Head Grower | Approx. 2019–Aug 2022

- Supervised approximately five employees and directed staffing, production planning, inventory, standard operating procedures, and quality-control improvements.

VISITING ANGELS — Home Care Aide (Part-Time) | 2022–Present

- Provide individualized client support while coordinating professionally with families and care teams.

EDUCATION

Skagit Valley College — Mount Vernon, WA | Associate of Science (AS), Data Analysis and Management — Nearing completion

Computer Science — 90+ college credits completed toward a bachelor's degree; degree not yet awarded (planned completion of studies).

California State University, Sacramento — Prior coursework in Computer Science, Mathematics, Chemistry, and related sciences.

CERTIFICATION PREPARATION

CompTIA Security+ • Network+ • A+ • Tech+ — Preparing; certifications not yet earned
