PROFESSIONAL SUMMARY

Business systems and analytics professional combining financial management with production software development in healthcare. Experienced defining requirements, standardizing KPIs, developing database applications, and validating reporting outputs. Designed centralized reporting across six managers and reduced personal reporting workload from approximately 20 to 2 hours weekly (90%). Brings C#/ASP.NET, SQL, Excel/VBA, and PowerShell experience to operational reporting and process improvement.

TECHNICAL AND BUSINESS SKILLS

Data and reporting: SQL, Microsoft Access, SQLite, SQL Server, MySQL, Excel, VBA, dashboards, KPI definitions, data validation, reconciliation, workforce analysis.

Development and systems: C#, ASP.NET, PowerShell, Delphi, REST APIs, HTTP requests and response processing, XML, Salesforce customization, authentication, role-based access control, Windows Server, Visual Studio, Team Foundation Server, Git/GitHub.

Business analysis: Requirements definition, workflow design, stakeholder collaboration, process automation, financial reporting, fully burdened labor-cost analysis, cash flow forecasting, QuickBooks.

PROFESSIONAL EXPERIENCE

Rainier Rapid LLC | Finance Manager

December 2025 - Present | Washington

- Designed and implemented centralized reporting, standardizing KPI definitions and calculations across six managers and eliminating fragmented reporting spreadsheets for ownership, operations, HR, and dispatch.
- Automated reporting workflows, reducing personal reporting work from approximately 20 to 2 hours weekly (90%); standardized data processing and validated reporting accuracy.
- Develop Access applications and Excel/VBA and PowerShell automation for driver records, route imports, roster generation, vehicle assignments, overtime monitoring, and recurring management reporting.
- Reduced initial daily dispatch roster preparation from 60-90 minutes to under 3 minutes; rebuilt the Excel VBA workflow in Access to resolve recurring workbook overwrite problems.
- Own operational data collection, KPI development, and weekly and monthly executive reporting; translate business needs into application requirements with ownership and operations teams.

SELECTED PROJECT

Rainier Analytics | Operations and Financial Reporting Platform

Project developed within the Finance Manager role at Rainier Rapid LLC.

- Develop a local analytics dashboard connecting operational, workforce, and financial reporting with Access and SQLite data workflows, SQL queries, Excel models, and PowerShell automation; continue refining dashboard functionality and validation.

- Designed a fully burdened driver-cost model incorporating wages, overtime, bonuses, standby, paid time off, insurance, payroll taxes, fleet losses, and operating expenses to support staffing, forecasting, and route profitability analysis.
- Preserve source records and calculation lineage, reconcile imported data, and validate reporting outputs against source workbooks; maintain a separate public demonstration using fictional data.
- Built a rolling 13-week cash flow forecast integrating revenue, payroll, fleet costs, vendor obligations, and cash balances to support ownership decisions.

PROFESSIONAL EXPERIENCE CONTINUED

Health Financial Systems | Software Developer

February 2010 - February 2015 | Elk Grove, CA

- Developed and maintained Medicare cost reporting and healthcare financial reporting applications using C#, ASP.NET, Delphi, VBA, SQL Server, and MySQL.
- Built customer-facing search forms, backend functionality, SQL queries, report generation, and downloads; optimized queries and databases to increase immediate report-download availability by approximately 50%.
- Personally coded HTTP/API requests, response handling, and data processing for Medicare cost reporting software; worked with XML and custom Excel interfaces to HFS software.
- Implemented database-backed customer authentication and role-based permissions by subscription tier and facility type; separately customized Salesforce customer account and permission functionality through code, queries, and database changes.
- Built reusable import routines for tens of thousands of healthcare reports with data validation, error logging, and failure notifications; investigated duplicate records, missing fields, and format inconsistencies.
- Developed stored procedures, modified schemas, and supported database backups, restores, and Windows Server administration; tested changes before lead-programmer review and release.
- Developed original features and enhancements for HICARIS/IRIS healthcare reporting applications using C#, ASP.NET, Delphi, Java, HTML, CSS, XML, SQL, and VBA.
- Built adaptive compatibility logic for browser, operating-system, and Excel-version differences; configured virtual machines and tested application compatibility across environments.
- Supported Windows Server, SQL Server, web application, and database configuration; used TFS for version control and completed assigned Asana defects and tasks.
- Documented defect investigations, resolutions, and follow-up in Salesforce CRM.

ADDITIONAL EXPERIENCE

Visiting Angels | Home Care Aide, Part Time | 2022 - Present
Client care, documentation, and communication with families and care teams.

Northwest Grown Products LLC | Head Grower | Approximately 2019 - August 2022
Production planning, staff coordination, operating procedures, and quality control.

EDUCATION

Skagit Valley College | Associate of Science in Data Analysis and Management
In progress

California State University, Sacramento | Computer Science coursework
90+ college credits completed toward a bachelor's degree; degree not awarded.
