MORGAN BRIGGS

BUSINESS SYSTEMS ANALYST | APPLICATIONS & PROCESS IMPROVEMENT

Mount Vernon, WA | (916) 793-6597 | Bmorgan8906@gmail.com linkedin.com/in/morgan-briggs-b43a10334 | morgan238-ctrl.github.io/morgan-briggs-portfolio/

PROFESSIONAL PROFILE

Business systems and software professional connecting requirements, workflow design, data, and automation with operational needs. Five years of production healthcare software development; now directs human-governed modernization of personally authored OMS software.

CORE SKILLS

Requirements analysis • Application support • Workflow design • Microsoft Access • SQL • Salesforce • PowerShell • RBAC • Testing • Financial systems • Dependency management • Acceptance criteria

PROFESSIONAL EXPERIENCE

Rainier Rapid LLC | Finance Manager | December 2025 - Present

- Personally authored the original working core of my Operations Management System (OMS) before ChatGPT, including business logic, calculations, automation, and the database foundation. I own the software; Rainier Rapid LLC is a client.
- Built proactive overtime forecasting from recorded hours and estimated assignment duration; designed review triggers and fair route reassignment to support staffing decisions.
- Designed and implemented centralized reporting, standardized KPI definitions and calculations across six managers, and eliminated fragmented reporting spreadsheets; reduced personal reporting work from approximately 20 to 2 hours weekly (90%), based on approximate recurring effort rather than a time study.
- Created Excel VBA dispatch roster automation and subsequently rebuilt it in Microsoft Access, reducing a formerly manual 60-90-minute process to under 3 minutes; dispatchers verify and adjust final assignments.
- Direct two AI-assisted coding workstreams with integration, independent testing, documentation, project operations, and OMS Development Coordinator support. Define acceptance criteria, manage dependencies, direct defect correction, and retain acceptance and release authority.
- Designed fully burdened labor-cost and route profitability models and a rolling 13-week cash-flow forecast to support staffing and financial decisions.

Health Financial Systems | Software Developer | February 2010 - February 2015

- One of two HCRIS developers under the lead programmer; developed C#/ASP.NET backend report generation, historical searches and downloads.
- Built database-backed authentication and subscription/facility-based authorization; developed Salesforce customer permissions functionality. Implemented selected Medicare financial calculations from provided specifications; validated outputs against expected results and sample reports.
- Integrated Excel VBA with Delphi components through a DLL for bidirectional data exchange, calculation execution and validation that blocked invalid imports without opening the desktop UI. Partnered with CEO Becky Dolin to jointly define Excel/API integration requirements from customer feedback; implemented and iteratively refined the tool with her until it met customer needs.
- Built large-scale scheduled/manual imports with validation, logging and failure notifications; SQL/database optimization increased reports available for immediate download by approximately 50%.

ADDITIONAL EXPERIENCE

Visiting Angels | Home Care Aide, Part Time | 2022 - Present

Provide individualized client support and communicate with families and care teams.

Northwest Grown Products LLC | Head Grower | Approximately 2019 - August 2022

Supervised approximately five employees; coordinated staffing, production, inventory, procedures, and quality improvements.

EDUCATION

Skagit Valley College - Associate of Science in Data Analysis and Management (in progress). California State University, Sacramento - Computer Science coursework. 90+ college credits toward a bachelor's degree; degree not awarded.
