MORGAN BRIGGS

BUSINESS INTELLIGENCE | OPERATIONS ANALYTICS

Mount Vernon, WA | (916) 793-6597 | Bmorgan8906@gmail.com linkedin.com/in/morgan-briggs-b43a10334 | morgan238-ctrl.github.io/morgan-briggs-portfolio/

PROFESSIONAL PROFILE

Analytics and business systems professional designing KPIs, validated data workflows, dashboards, and financial models for management decisions. Combines five years of healthcare software development with original OMS programming and human-governed AI development.

CORE SKILLS

KPI design • Dashboard reporting • SQL • Excel/VBA • Microsoft Access • PowerShell • Data validation • Financial modeling • Operational analytics

PROFESSIONAL EXPERIENCE

Rainier Rapid LLC | Finance Manager | December 2025 - Present

- Personally authored the original working core of my Operations Management System (OMS) before ChatGPT, including business logic, calculations, automation, and the database foundation. I own the software; Rainier Rapid LLC is a client.
- Designed and implemented centralized reporting, standardized KPI definitions and calculations across six managers, and eliminated fragmented reporting spreadsheets; reduced personal reporting work from approximately 20 to 2 hours weekly (90%), based on approximate recurring effort rather than a time study.
- Developed overtime forecasting using recorded hours and estimated assignment duration; separated observed benchmark comparisons from causal claims and modeled payroll costs.
- Designed fully burdened labor-cost and route profitability models and a rolling 13-week cash-flow forecast to support staffing and financial decisions.
- Created Excel VBA dispatch roster automation and subsequently rebuilt it in Microsoft Access, reducing a formerly manual 60-90-minute process to under 3 minutes; dispatchers verify and adjust final assignments.
- Direct two AI-assisted coding workstreams with integration, independent testing, documentation, project operations, and OMS Development Coordinator support. Define acceptance criteria, manage dependencies, direct defect correction, and retain acceptance and release authority.

Health Financial Systems | Software Developer | February 2010 - February 2015

- Optimized SQL queries and databases, increasing the number of reports available for immediate download by approximately 50%.
- Built large-scale scheduled and manual imports using C#, SQL, Delphi and VBA, with validation, logging and failure notifications. Implemented selected Medicare financial calculations from provided specifications; validated outputs against expected results and sample reports.
- Developed SQL Server/MySQL schemas, queries and stored procedures; optimized databases and supported backups, restores and data validation.
- One of two HCRIS developers under the lead programmer; developed C#/ASP.NET backend report generation, historical searches and downloads. Partnered with CEO Becky Dolin to jointly define Excel/API integration requirements from customer feedback; implemented and iteratively refined the tool with her until it met customer needs.

ADDITIONAL EXPERIENCE

Visiting Angels | Home Care Aide, Part Time | 2022 - Present

Provide individualized client support and communicate with families and care teams.

Northwest Grown Products LLC | Head Grower | Approximately 2019 - August 2022

Supervised approximately five employees; coordinated staffing, production, inventory, procedures, and quality improvements.

EDUCATION

Skagit Valley College - Associate of Science in Data Analysis and Management (in progress). California State University, Sacramento - Computer Science coursework. 90+ college credits toward a bachelor's degree; degree not awarded.
