MORGAN BRIGGS

IT SYSTEMS ADMINISTRATION | ENTERPRISE APPLICATIONS

Mount Vernon, WA | (916) 793-6597 | Bmorgan8906@gmail.com linkedin.com/in/morgan-briggs-b43a10334 | morgan238-ctrl.github.io/morgan-briggs-portfolio/

PROFESSIONAL PROFILE

Systems and application professional experienced with Windows Server/IIS, databases, authentication and authorization, backups, troubleshooting, and automation. Brings five years of production healthcare software development and current operational systems ownership.

CORE SKILLS

Microsoft Entra ID • Windows Server/IIS • Identity and access management • RBAC • Salesforce • PowerShell • SQL • Application support • Backup procedures

PROFESSIONAL EXPERIENCE

Rainier Rapid LLC | Finance Manager | December 2025 - Present

- Personally authored the original working core of my Operations Management System (OMS) before ChatGPT, including business logic, calculations, automation, and the database foundation. I own the software; Rainier Rapid LLC is a client.
- Develop a local dashboard with SQLite working records, read-only Access refresh, JSON inputs, HTML display data, and staged imports with validation, correction, revalidation, and commit. Installable deployment, OMS role-based permissions, and multi-user synchronization remain in development or planning.
- Created Excel VBA dispatch roster automation and subsequently rebuilt it in Microsoft Access, reducing a formerly manual 60-90-minute process to under 3 minutes; dispatchers verify and adjust final assignments.
- Direct two AI-assisted coding workstreams with integration, independent testing, documentation, project operations, and OMS Development Coordinator support. Define acceptance criteria, manage dependencies, direct defect correction, and retain acceptance and release authority.
- Designed and implemented centralized reporting, standardized KPI definitions and calculations across six managers, and eliminated fragmented reporting spreadsheets; reduced personal reporting work from approximately 20 to 2 hours weekly (90%), based on approximate recurring effort rather than a time study.

Health Financial Systems | Software Developer | February 2010 - February 2015

- Configured Windows Server and IIS, deployed websites and troubleshot production issues; used Visual Studio/TFS, personal testing and lead-programmer review.
- Developed SQL Server/MySQL schemas, queries and stored procedures; optimized databases and supported backups, restores and data validation.
- Built database-backed authentication and subscription/facility-based authorization; developed Salesforce customer permissions functionality.
- Built large-scale scheduled and manual imports using C#, SQL, Delphi and VBA, with validation, logging and failure notifications.
- One of two HCRIS developers under the lead programmer; developed C#/ASP.NET backend report generation, historical searches and downloads. Partnered with CEO Becky Dolin to jointly define Excel/API integration requirements from customer feedback; implemented and iteratively refined the tool with her until it met customer needs.

ADDITIONAL EXPERIENCE

Visiting Angels | Home Care Aide, Part Time | 2022 - Present

Provide individualized client support and communicate with families and care teams.

Northwest Grown Products LLC | Head Grower | Approximately 2019 - August 2022

Supervised approximately five employees; coordinated staffing, production, inventory, procedures, and quality improvements.

EDUCATION

Skagit Valley College - Associate of Science in Data Analysis and Management (in progress). California State University, Sacramento - Computer Science coursework. 90+ college credits toward a bachelor's degree; degree not awarded.
