MORGAN BRIGGS

HEALTHCARE TECHNOLOGY | FINANCIAL SYSTEMS ANALYSIS

Mount Vernon, WA | (916) 793-6597 | Bmorgan8906@gmail.com linkedin.com/in/morgan-briggs-b43a10334 | morgan238-ctrl.github.io/morgan-briggs-portfolio/

PROFESSIONAL PROFILE

Healthcare financial software professional with five years of production development in reporting, Medicare calculations, SQL, integrations, and access controls. Combines software engineering with operational finance, original OMS development, and human-governed delivery.

CORE SKILLS

Healthcare financial data • C#/ASP.NET • SQL • Application support • Salesforce • RBAC • Reporting • Reconciliation • Workflow automation

PROFESSIONAL EXPERIENCE

Rainier Rapid LLC | Finance Manager | December 2025 - Present

- Personally authored the original working core of my Operations Management System (OMS) before ChatGPT, including business logic, calculations, automation, and the database foundation. I own the software; Rainier Rapid LLC is a client.
- Develop a local dashboard with SQLite working records, read-only Access refresh, JSON inputs, HTML display data, and staged imports with validation, correction, revalidation, and commit. Installable deployment, OMS role-based permissions, and multi-user synchronization remain in development or planning.
- Designed fully burdened labor-cost and route profitability models and a rolling 13-week cash-flow forecast to support staffing and financial decisions.
- Designed and implemented centralized reporting, standardized KPI definitions and calculations across six managers, and eliminated fragmented reporting spreadsheets; reduced personal reporting work from approximately 20 to 2 hours weekly (90%), based on approximate recurring effort rather than a time study.
- Direct two AI-assisted coding workstreams with integration, independent testing, documentation, project operations, and OMS Development Coordinator support. Define acceptance criteria, manage dependencies, direct defect correction, and retain acceptance and release authority.

Health Financial Systems | Software Developer | February 2010 - February 2015

- One of two HCRIS developers under the lead programmer; developed C#/ASP.NET backend report generation, historical searches and downloads.
- Implemented selected Medicare financial calculations from provided specifications; validated outputs against expected results and sample reports.
- Integrated Excel VBA with Delphi components through a DLL for bidirectional data exchange, calculation execution and validation that blocked invalid imports without opening the desktop UI. Partnered with CEO Becky Dolin to jointly define Excel/API integration requirements from customer feedback; implemented and iteratively refined the tool with her until it met customer needs.
- Optimized SQL queries and databases, increasing the number of reports available for immediate download by approximately 50%.
- Built large-scale scheduled and manual imports using C#, SQL, Delphi and VBA, with validation, logging and failure notifications.

ADDITIONAL EXPERIENCE

Visiting Angels | Home Care Aide, Part Time | 2022 - Present

Provide individualized client support and communicate with families and care teams.

Northwest Grown Products LLC | Head Grower | Approximately 2019 - August 2022

Supervised approximately five employees; coordinated staffing, production, inventory, procedures, and quality improvements.

EDUCATION

Skagit Valley College - Associate of Science in Data Analysis and Management (in progress). California State University, Sacramento - Computer Science coursework. 90+ college credits toward a bachelor's degree; degree not awarded.
