PROFESSIONAL SUMMARY

Analytics and financial operations professional with software development experience and a record of independently designing KPIs, cost models, reporting automation, and decision-support tools. Built a 30–50-metric performance framework and reduced weekly reporting effort by an estimated 96–99%.

TECHNICAL & BUSINESS SKILLS

Operational KPIs • Financial modeling • Performance reporting • SQL • Excel / VBA • Microsoft Access • Cash-flow forecasting • Labor-cost analytics • Data validation • PowerShell • QuickBooks • AI-assisted analysis

PROFESSIONAL EXPERIENCE

RAINIER RAPID LLC — Finance Manager | *Dec 2025–Present* | *Washington*

Promoted from delivery driver to Finance Manager within approximately three weeks; partner directly with company ownership on financial and operational improvements.

- Independently defined 30–50 operational KPIs and designed recurring reporting used by ownership, operations, performance management, HR, and dispatch.
- Automated weekly operational reporting, reducing an estimated 25–40 hours of manual work to 30–60 minutes (approximately 96–99% less time).
- Built a company-wide fully burdened driver-cost model incorporating compensation, taxes, insurance, fleet losses, and operating expenses to support staffing, forecasting, and route profitability decisions.
- Developed a rolling 13-week cash-flow forecast integrating revenue, payroll, fleet costs, vendor obligations, and cash balances for management planning.
- Recovered more than $85,000 in company funds through invoice disputes and vehicle repair reimbursements; identified $3,750 in recurring monthly vendor savings ($45,000 annualized).
- Developed a Microsoft Access operations application supporting driver records, route imports, automated rosters, vehicle assignments, performance rankings, and overtime monitoring.
- Independently developed an Excel VBA roster automation from a manual 60–90-minute daily process, then rebuilt the solution in Microsoft Access; reduced roster preparation to under 3 minutes.
- Direct AI-assisted application development by defining requirements, guiding implementation, troubleshooting, and testing and validating results against operational needs.

HEALTH FINANCIAL SYSTEMS — Software Developer | Feb 2010–Feb 2015

- Optimized SQL queries and databases, increasing immediate report-download availability by approximately 50%.
- Built reusable data imports and validation/error-handling workflows for datasets containing tens of thousands of healthcare financial reports.
- Developed and maintained healthcare financial reporting software using C#, ASP.NET, Delphi, VBA, SQL Server, and MySQL.
- Implemented database-backed customer authentication and role-based access controls tied to subscription tiers and healthcare facility types.
- Developed SQL stored procedures and performed schema changes, database restores, testing, and production troubleshooting.
- Customized Salesforce customer account and permission functionality; administered Windows Server accounts, permissions, backups, and infrastructure.

NORTHWEST GROWN PRODUCTS LLC — Head Grower | *Approx. 2019–Aug 2022*

- Supervised approximately five employees and directed staffing, production planning, inventory, standard operating procedures, and quality-control improvements.

VISITING ANGELS — Home Care Aide (Part-Time) | *2022–Present*

- Provide individualized client support while coordinating professionally with families and care teams.
