PROFESSIONAL SUMMARY Business systems and software development professional bridging financial operations and technical delivery. Experienced designing database applications, defining operational KPIs, automating workflows, and translating business needs into tested solutions. Reduced recurring reporting preparation from hours to minutes through automation.

TECHNICAL & BUSINESS SKILLS Business systems analysis • Requirements definition • Workflow optimization • SQL • Microsoft Access • C# / ASP.NET • PowerShell • VBA • Salesforce • Financial systems • AI-assisted development

PROFESSIONAL EXPERIENCE

RAINIER RAPID LLC — Finance Manager | Dec 2025–Present | Washington Promoted from delivery driver to Finance Manager within approximately three weeks; partner directly with company ownership on financial and operational improvements.

- Automated recurring operational reporting, reducing preparation from hours to minutes.
- Independently developed an Excel VBA roster automation and rebuilt the solution in Microsoft Access, reducing roster preparation from hours to minutes.
- Developed a Microsoft Access operations application supporting driver records, route imports, automated rosters, vehicle assignments, performance rankings, and overtime monitoring.
- Independently defined operational KPIs and designed recurring reporting used by ownership, operations, performance management, HR, and dispatch.
- Built a company-wide fully burdened driver-cost model incorporating compensation, taxes, insurance, fleet losses, and operating expenses to support staffing, forecasting, and route profitability decisions.
- Recovered substantial company funds through invoice reconciliation and reimbursement follow-up; identified recurring vendor cost savings.
- Direct AI-assisted application development by defining requirements, guiding implementation, troubleshooting, and testing and validating results against operational needs.
- Developed a rolling 13-week cash-flow forecast integrating revenue, payroll, fleet costs, vendor obligations, and cash balances for management planning.

HEALTH FINANCIAL SYSTEMS — Software Developer | Feb 2010–Feb 2015

- Implemented database-backed customer authentication and role-based access controls tied to subscription tiers and healthcare facility types.
- Developed and maintained healthcare financial reporting software using C#, ASP.NET, Delphi, VBA, SQL Server, and MySQL.
- Optimized SQL queries and databases, increasing immediate report-download availability by approximately 50%.
- Built reusable data imports and validation/error-handling workflows for datasets containing tens of thousands of healthcare financial reports.
- Customized Salesforce customer account and permission functionality; administered Windows Server accounts, permissions, backups, and infrastructure.
- Developed SQL stored procedures and performed schema changes, database restores, testing, and production troubleshooting.

NORTHWEST GROWN PRODUCTS LLC — Head Grower | Approx. 2019–Aug 2022

- Supervised approximately five employees and directed staffing, production planning, inventory, standard operating procedures, and quality-control improvements.

VISITING ANGELS — Home Care Aide (Part-Time) | 2022–Present

- Provide individualized client support while coordinating professionally with families and care teams.
